Breaking the Seal: The Hobbit – The Battle of the Five Armies. Battle for Middle-Earth; Der Herr der Ringe: Die Schlacht um Mitteleerde . 1. Field of the Invention The present invention relates to a combustion control apparatus for controlling a combustion state of a fuel, in particular, for an internal combustion engine for use in an automotive vehicle. 2. Description of the Related Art A known combustion control apparatus disclosed in Japanese Patent Application Laid-open No. 7-25167 controls a combustion state of fuel fed to an internal combustion engine, according to running conditions of the vehicle and the like, so that a desired air-fuel ratio is obtained. When the engine is decelerated, or when a load applied to the engine is small, etc., it is necessary to greatly increase an amount of air fed to the engine, to reduce an amount of fuel fed to the engine, so that the air-fuel ratio is increased from an optimum value. However, when the desired air-fuel ratio is obtained by excessively increasing the amount of air fed to the engine, a combustion state of the fuel may be disturbed, and a generation of harmful emissions such as NOx or soot may be caused. To cope with this problem, in the known combustion control apparatus, an amount of air fed to the engine is increased, while an amount of fuel fed to the engine is reduced, when it is required to greatly increase the amount of air fed to the engine, to reduce the amount of fuel fed to the engine, in order to obtain the desired air-fuel ratio. In the known combustion control apparatus, the amount of air fed to the engine is controlled, based on the output of the throttle position sensor which detects an opening degree of the throttle valve. The output of the throttle position sensor is referred to as a throttle valve position command value, for example. When the engine is decelerated, the throttle valve position command value increases, and the amount of air fed to the engine increases. When the engine is accelerated, the throttle valve position command value decreases, and the amount of air fed to the engine decreases. If the amount of air fed to the engine increases, when it is desired to decelerate the engine

House of Spirits (film) House of Spirits () is a 2019 Chinese drama film directed by Li Yang. It was screened in the Special Presentations section of the 2017 Toronto International Film Festival. It was selected as the Chinese entry for the Best International Feature Film at the 92nd Academy Awards, but it was not nominated.
